WEB-X

moved no place since WEB-X is invisibly mounted in the dispenser or in the basement and communicate (with password) via Bluetooth!

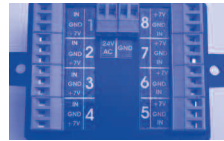

WEB

THE INNOVATION !

WEB-X Draft Beer Counter

We are pleased to introduce you to our modern meters for beverage dispensing systems with data retrieval via Bluetooth.

After installation of the WEB-X-board simply download our new app "WEB-X" on your mobile phone and you can control your exact beverage consumption anytime via your mobile phone. The WEB-X counter board is used for beer, wine, premix or for post-mix valves. There are 8 channels, each channel can be performed on flowmeter (for draft beer counter) or via timing (for postmix valves) through the same channel. Each connected beverage line can now easily be quantified, the quantity called will be displayed directly in our easy to use app. The supply voltage is 24V AC. The cheapest option dispensed beverages counts at any time and simply get on the android smartphone!
